

With **Prizmah**, patients who prefer non-invasive medical aesthetic treatments to surgical procedures can use their body's regenerative power to rejuvenate their skin without any concern for infection. Patients in pursuit of a younger renewed look can benefit tremendously from **Prizmah**.

Thus **Prizmah** helps:

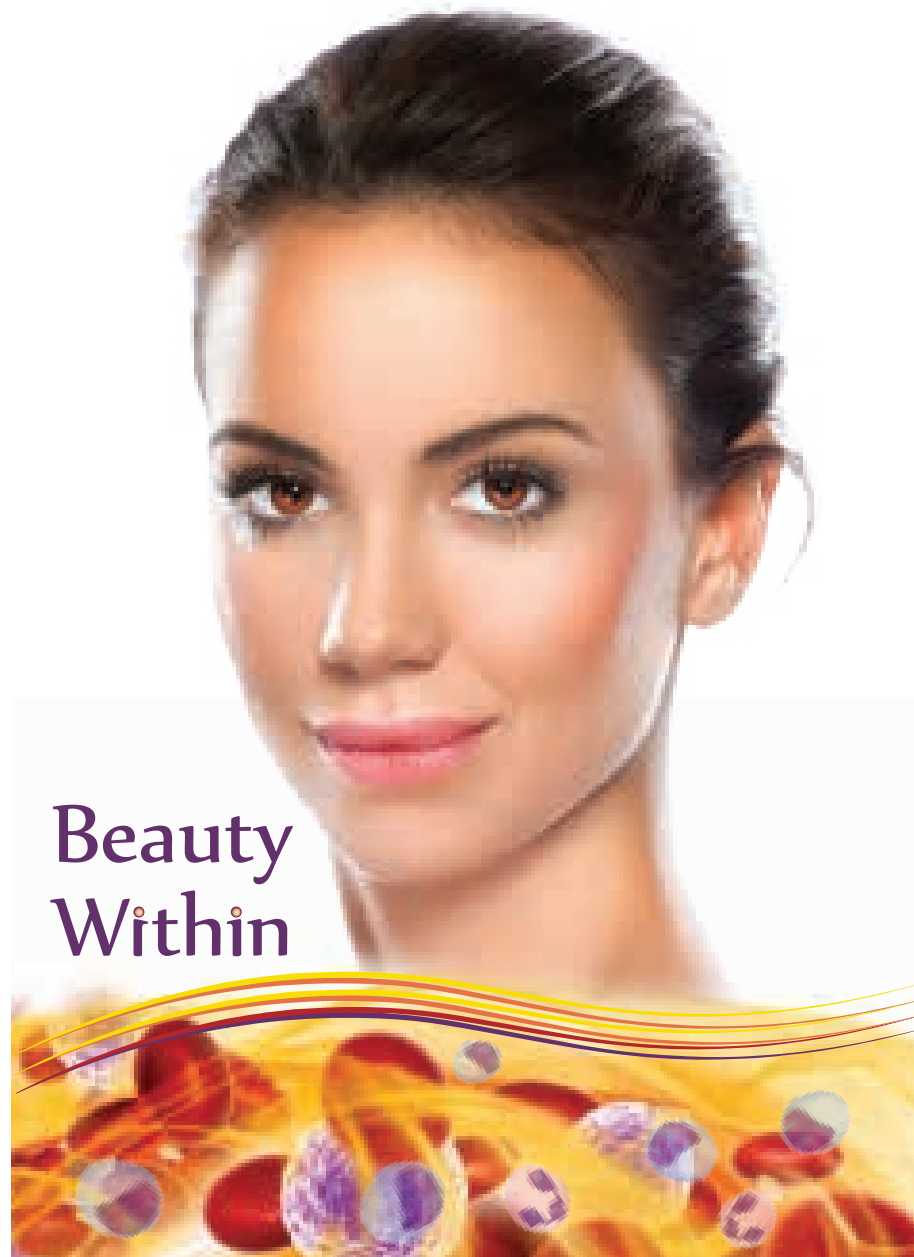

- Rejuvenating the skin.
- Eliminating skin finelines & wrinkles.
- Improving skin texture, increasing volume via the increased production of elastin & collagen and diminishing & improving the appearance of scars.
- Providing fuller facial features as an alternative to dermal fillers.
- Improving the appearance of acne scarring.
- Accelerating hair restoration & hair growth.
- Speeding up the healing process after facial peel, micro-needling & laser therapy.
- Fat grafts to survive with less bruising and inflammation reaction & easier application due to liquefaction effect of **Prizmah**.

Platelet-rich plasma (PRP) is a cutting-edge form of regenerative medicine that is becoming widely used for cosmetic therapy. It helps restore a youthful skin and smooth out finelines & wrinkles. The important part of PRP is the fact that it uses your own blood as part of restorative technique in which the plasma of your own blood is concentrated with platelets and re-injected back in to the tissues of your skin. The growth factor substances of platelets are responsible to Regenerate, Rejuvenate and Refresh the skin.

What is Prizmah?

Prizmah is a state of the art, completely closed system technology to prepare auto- logous platelet rich plasma by using patient's own blood.

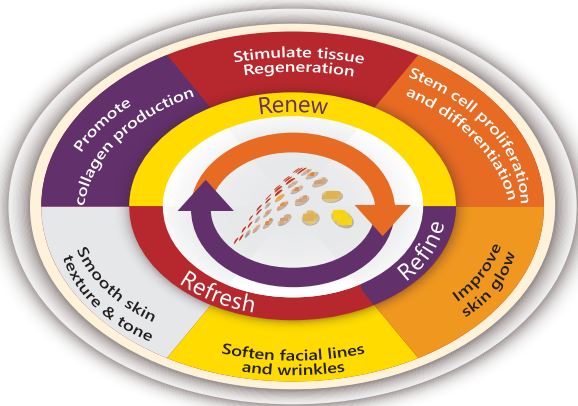

Benefits of Prizmah include:

- **Prizmah** offers high concentration of platelets within plasma with almost no RBCs & WBCs for desired aesthetic results.
- Built-in technology to convert PRP into PRF (Platelet Rich Fibrin). PRF offers sustained release of growth factors from platelets for a longer period of time and provides longer lasting effects.
- Minimum pain at the injection area due to neutral pH of PRP.
- Prizmah offers completely sterile kit & closed system i.e. no exposure of external environment in PRP preparation & collection.
- Easy to use, take less time, requires less blood and is not user dependent like other systems.

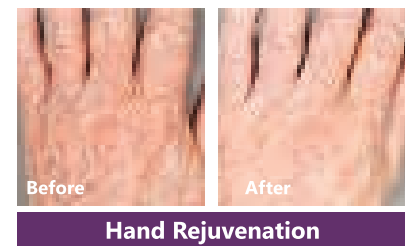

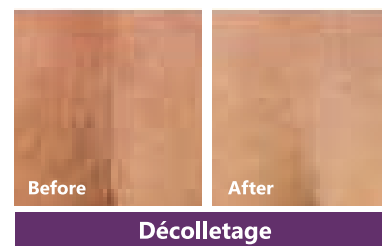

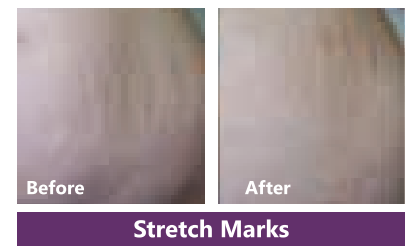

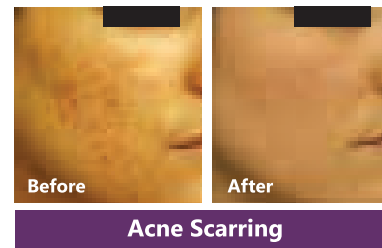

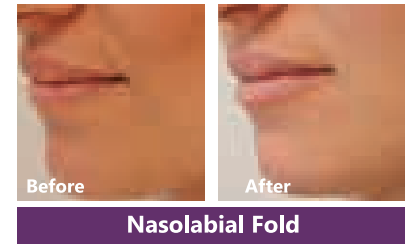

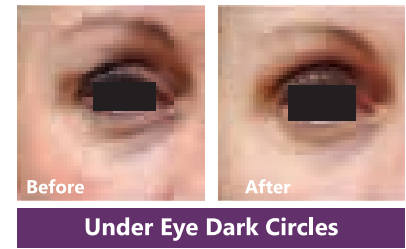

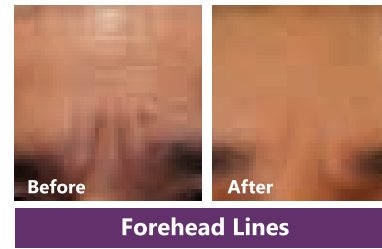

One significant benefit of **Prizmah** is that it is safe and you are using your body's own natural process, hence there is practically no chance of rejection, allergic reaction and infection.

What are the key advantages of Prizmah?

Prizmah offers following advantages:

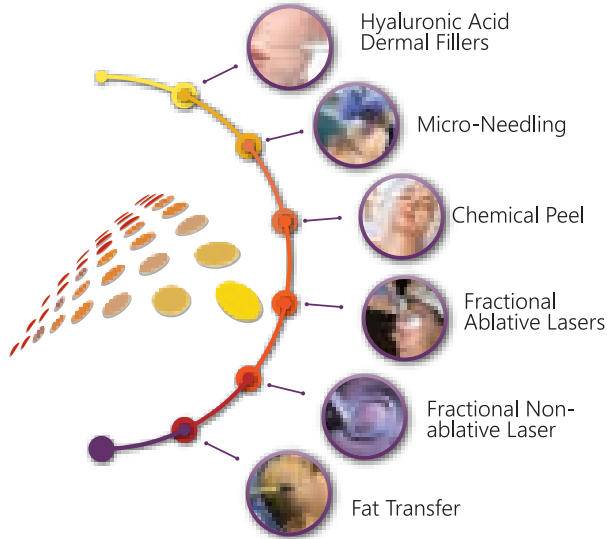

Clinical Results

Can Prizmah be combined with other aesthetic treatments?

Yes. **Prizmah** can be combined with other aesthetic procedures like:

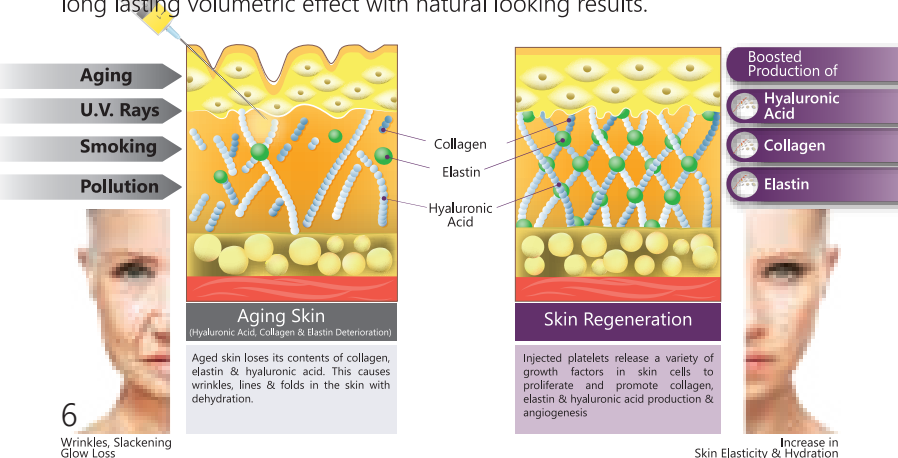

How often should I have Prizmah treatments done?

This will be discussed between you and your physician. The treatment depends upon the skin condition and treatment area. However, up to three injections may be given on monthly basis and one injection after a year as a follow-up.

How does Prizmah work?

Skin aging is a continuous process which can be accelerated by genetics, facial expressions and extrinsic factors like a poor diet, smoking and sun exposure. Prizmah is a form of bio-stimulator that is safe and promote collagen, elastin & hyaluronic acid production & angiogenesis, thus gives long lasting volumetric effect with natural looking results.

What different areas can be treated with Prizmah?

Prizmah is known to promote tissue regeneration and physicians noted refresh & youthful appearance.

Treatment areas include:

Other treatment areas include:
